

Single Price Model – status update

11.02.21

Visit nordicbalancingmodel.net

Agenda

- Summary on the Common Market Design document
- National status on the legal processes
- Ongoing TSO discussion on the possibility to harmonise the BRP imbalance fee level
- Updated timeline with milestones included
- Relevant information from eSett

Common Market Design document

- Stakeholder feedback and TSO's common Nordic answer to the Common Market Design document is found [here](#)
- All the Nordic stakeholder feedback received for the Common Market Design document has been published on the NBM web
- Based on all the feedback received it is the Nordic TSOs opinion that the proposed common market design still serves the point of which it was intended for the interim phase starting on 1 November this year

National status on the legal processes

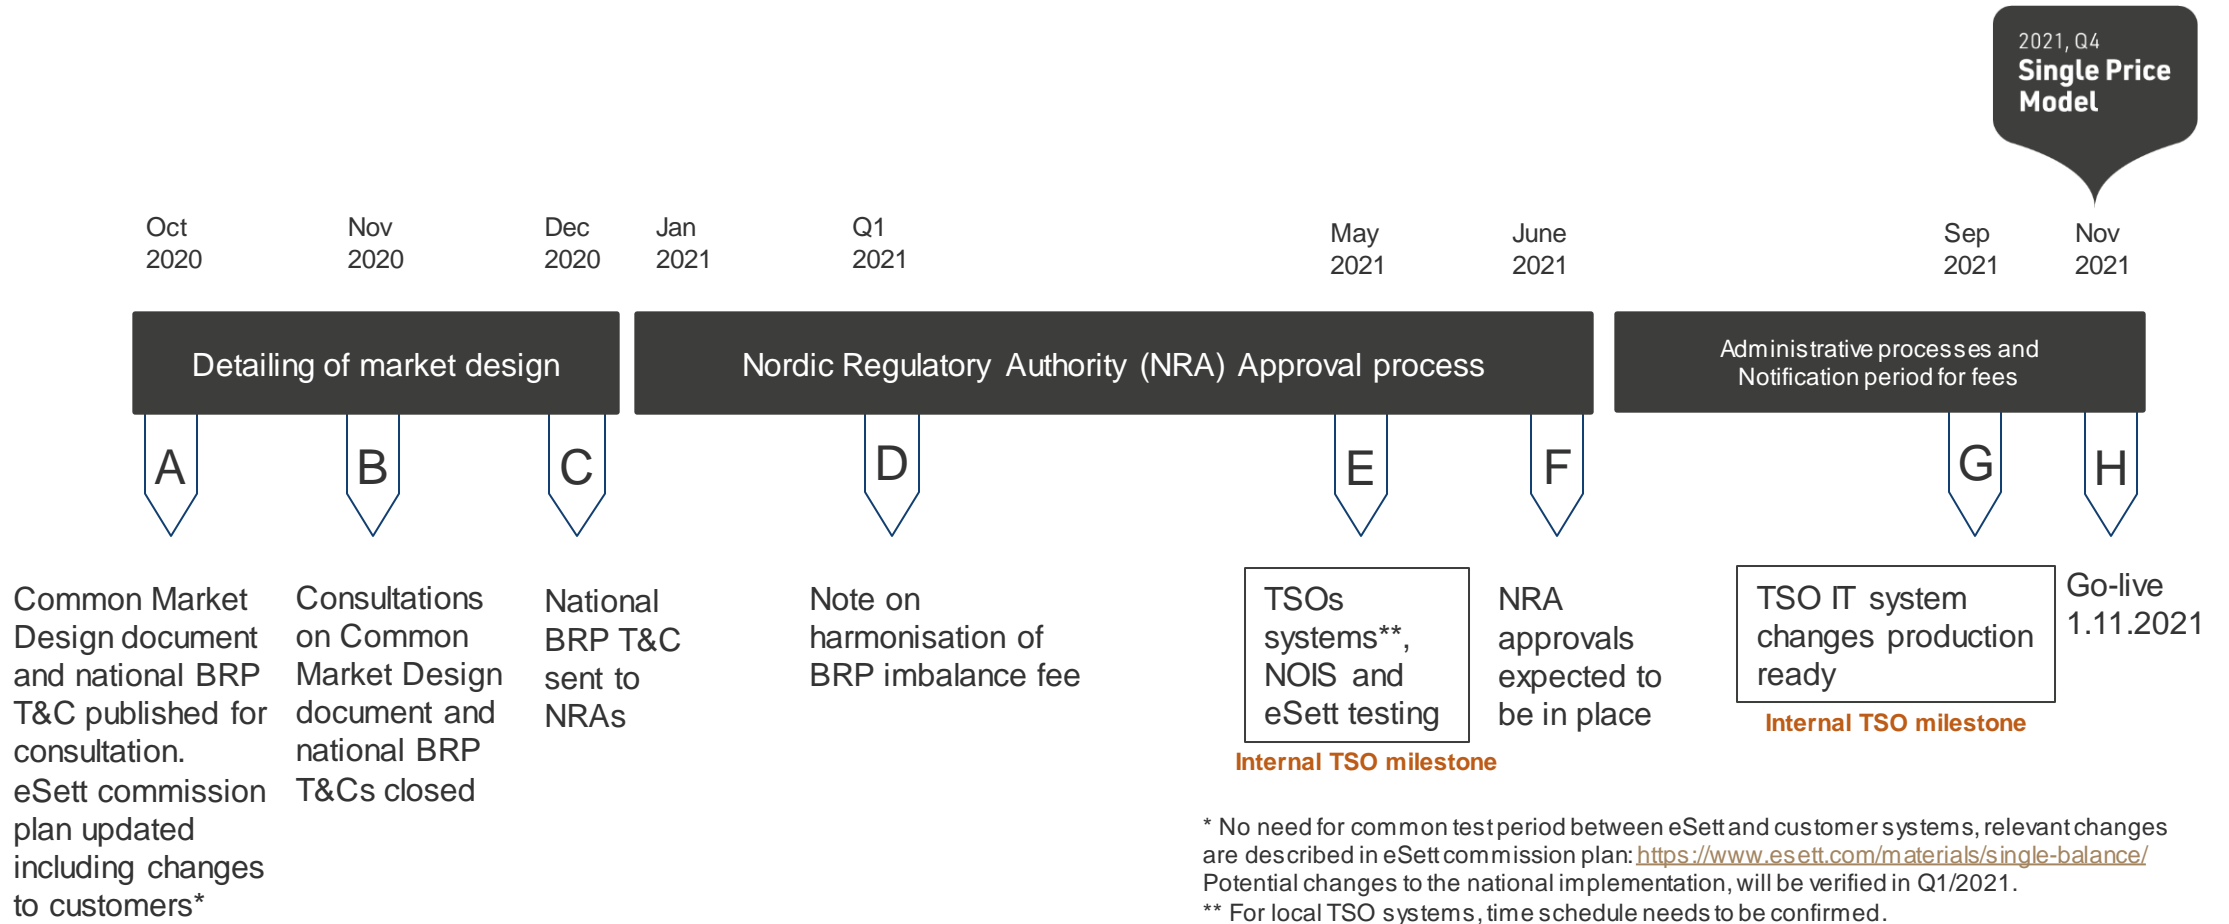

- Energinet sent their updated BRP Terms & Conditions for approval to the Danish NRA, DUR, on 22 December 2020
 - DUR expects to open the public consultation very soon
- Fingrid sent their updated BRP Terms & Conditions package for approval to the Finnish NRA, EV, on 23 December 2020
 - EV have their public consultation open from 13 January until 15 February
- The Norwegian NRA, RME, expects to send necessary changes to national legislation to implement the Single Price Model on formal consultation in March
- Svenska kraftnät sent their proposal for BRP Terms & Conditions to the Swedish NRA, Ei, on 13 November 2020 and will send their proposal for the new BRP fee structure on 5 February

Possibility to harmonise the BRP imbalance fee level

- Ongoing TSO discussions to determine if it is possible to harmonise the BRP imbalance fee level
- Aim to publish a note on this by end of Q1
- Current overview of the BRP imbalance fee levels in the Nordics:

[EUR/MWh]	Denmark	Norway	Sweden	Finland
2021	0,13	0,50	0,50	0,50
2020	0,13	0,16	0,50	0,50

Single Price Model timeline with milestones included
