

# MFRR EAM - NRA process and status

24.03.2022 / NBM reference group meeting

Visit [nordicbalancingmodel.net](http://nordicbalancingmodel.net)

# Energinet

- The NRA approval application (mFRR EAM automated operation) was sent to the Danish regulator on Oct 7th 2021. Energinet received feedback March 2022 to change the mFRR price limits in coordination and agreement with other Nordic TSOs and resend the application by May 7th 2022.
- Regulator approval expected by July 2022.

# Fingrid

- The NRA approval application of mFRR T&C for EAM was delivered in December 2021. Due to the project delay it was withdrawn in January 2022. A new application will be prepared and delivered to the NRA during Q4 2022.
- mFRR T&C concerning changes in mFRR capacity markets and price limits were delivered to NRA March 2022.
- Update in mFRR T&C concerning 15 min ISP will be delivered to the NRA in May 2022

# Statnett

- A public consultation for updated T&Cs for a Nordic automated mFRR-market were sent for approval to RME 1st October and approved in December 2021.
- With the reassessment and new timeline for mFRR EAM, these T&Cs will be used as a basis for T&C updates that are EB GL compliant, as EB GL entered into force in Norway 1.July 2021. This will most likely go to consultation 1st June 2022.
- It is likely that T&C adjustments will have to be made in order to take into account 15 min ISP. EB GL compliance has to be ensured for all markets, including aFRR CM, mFRR CM and the new market for operational disturbance reserves which will function as a specific product in mFRR EAM.

# Svenska kraftnät

- A public consultation for updated T&Cs for the Transition Period before Automated mFRR EAM was held in June 2021 and they are now published.
- T&C for Automated Operation have been sent to the NRA and the details are currently being discussed with the NRA. When an agreement has been reached between the Swedish NRA and Svenska kraftnät, the NRA will lead a public consultation and thereafter start the approval process.
- The process for Balance Responsible Agreement T&C's updates for Automated mFRR EAM will start in the beginning of 2023 including public consultation and publication.
